SOURCING LOCAL TALENT & MAXIMIZING STATE INCENTIVES

Mantis Space selected New Mexico as its new headquarters to develop next-generation power-grid infrastructure supporting space missions—drawn by proximity to national laboratories, a robust supply chain, and a deeply skilled technical workforce.

STEM Boomerang provided end-to-end Talent Navigation support, sourcing and qualifying highly specialized engineering talent while maximizing state workforce incentives to offset hiring costs and accelerate team build-out. Within just five weeks, STEM Boomerang successfully sourced senior optical engineers and R&D manufacturing professionals critical to Mantis Space's mission.

As a result, Mantis Space **rapidly built a high-impact technical team, leveraged in-state talent, maximized state hiring incentives**—positioning the company for scalable growth in New Mexico's space ecosystem.

State hiring Incentives

"With STEM Boomerang's expertise, we maximized >\$500,000 in state funding to help us hire our team, these were critical first hires. With their extensive network of technical professionals, we were able to hire local professionals faster, increase our state reimbursement, and focus more on bringing energy infrastructure to space".

ERIC TRUITT

CEO, Mantis Space
